

BMR: Reflection/Summary ~~of~~ on your thoughts
about the BMR by Debbie Drape.

Graphic Organisers are a really powerful
tool to help students deal with large
amounts of ~~stuff~~ ^{process} information
in an effective and particularly useful way.
Because Visual Maps are so much easier for
students to remember, they allow a greater level
of recall & mastery.

~~For the same reason~~ Because they are much
easier for the teacher to analyse for vast
quantities of ^{written} notes; they are an excellent
tool for ~~the~~ teachers to see & see how
well a student understands a concept & also to
identify the learner's misconceptions.

I have one comment to make about the
Fishbone diagram. I have been very
interested to see ~~the~~ in these manuals that
it is only used for Cause & Effect/Consequences.
I have used it for students to ^{for example}
Summarise Vertebrate Groups as well
as Separation Techniques. Am I wrong?
Anyway I love them!!
